

7
A N
ALMANACK
FOR THE
YEAR OF CHRIST,

1671.

Being the third after *Bissextile*, or
Leap-year.

WHEREIN IS CONTAINED

A true description of the year, and of the several parts thereof;
both according to the English and Foreign Account; with
necessary Tables, and Observations of worth; with a just
account of such Eclipses, Solar or Lunar, as will happen
this year.

CALCULATED

For the Meridian of the Antient and Famous City of *London*;
whose Latitude is 51 degrees, 32 minutes; and may serve
for any part of *England*, without sensible error.

Collected and Published:

BY

LANCELOT COELSON,

Student in Astrologie and Physick.

LONDON, Printed by E. Oles for the Company of
Stationers, 1671.

Coelfon: 1671:

Moveable Feasts for the present year of our
Redemption, 1671.

The Julian or English } 1671 } The Forein, or Ne
Accompt. } Accompt.

	19	The Golden Number	19
28		Cycle of the Sun	28
		Domonical Letter	D
9		Roman Indiction	9
29		Epact	19
33		Number of Directions	1
February	19	Septuagesima	25 January
March	8	Dies Cinerum	11 February
April	23	Easter Day	29 March
May	28	Rogation Sunday	3 May
June	1	Ascension day	7 May
June	11	Whitsunday	17 May
December	3	Advent Sunday	29 Novemb.

Hillary Term begins the 23 of January, ends the 13 of
February; and hath 4 Returns.

Easter Term begins the 10th. of May, ends June the
5 th. and hath 5 Returns.

Trinity Term begins the 22 of June, ends the 12 of
July, and hath 4 Returns.

Michaelmas Term begins the 23 of October, ends the
28 of November; and hath 6 Returns.

Take notice, that the Exchequer openeth 8 daies before any Term be-
gins, except Trinity Term, in which it openeth but 4 daies before.

God us deliver from Civil Wars,
And from Domestick Jars.

*To the worshipful his singular
good Friend, John Friend
Esq; One of his Majesties
Captains in the Tower Ham-
lets.*

AMong the manifold Creatures of God (worthy Sir) that have in all ages diversly entertained many excellent Wits, and drawn them to the admiration and contemplation of the divine wisdom, none have provok'd mens studies more, or satisfied their desires so much, as the stars have, and yet the profession of late struck at by many writers who have not made themselves in any thing more famous, than in their bold calumnies against those rules and method which more learned men than themselves have for many ages thought fit to recommend unto posterity: The nobleness of the Subject, of which you, Sir, are right able to judge, has not wanted a Patronization from the finest Wits, and greatest Persons: 'Tis my present, collected into this small Volume, the best that my poor ability is

Coelson, 1671.

able to tender you, that wants and craves your Protection, under which it and my self shall abide safe, at least regardless of what may be said against us: Sir, my wish is, that your springing Honour in Martial Affairs, and other Laudable Studies, may still grow; whose continuance I wish, with as much happiness to your Family, as can be desired by him who shall further Study to serve You,

LANCELOT COELSON.

*From my house, at the sign
of the Royal-Oake in St.
Katherines Lane, near
the Tower of London:
May the 30th. 1670.*

January

January, 1671.

		'Tis not in humane power to change what fate Decrees; for all things have their certain date: Sleet, snow, and winds, this moneth begins, and ends, In <i>medio virtus</i> , no storm then offends.

April, 1671.

The mischief which the jarring stars do threat,
Fore-sight prevents, which do advantage wait,
Winter farewell, the tepid showers of rain
Fall timely on the late sprung grass and grain.

That sacred power that in this moneth remains
Shall put fresh juice in plants, and blood in veins;
And on their green decay'd, their redness dead,
Shall set a green more green, a red more red.

July, 1671.

Argus his eyes wise *Mercury* lull'd to sleep,
Love ever laughs, when jealousie doth weep.
The stars, and us, an higher power keeps under,
They threat, we fear, yet God does rule the Thunder.

August, 1671.

God rules the stars of heaven, and they rule so
As all men feel their influence here below.
'Tis wondrous hot, and dry; I dread to tell
What fear o' th' Plague; London I wish thee well.

September, 1671.

September's come, wherein our year resigns
The glorious Sun to the cold watery signs;
Some storms and tempests look for towards the fine,
And clouds so dense, as hinders Sol to shine.

An APPENDIX
To the preceding
ALMANACK.
FOR

The Year of our Redemption

1671.

Being the third after Bissextile, or
LEAP-YEAR.

Wherein you have two most necessary
Tables for Mariners and Travellers.

With an account of such Eclipses both Solar
and Lunar as will happen this Year.

As also a Chronography of the four
Quarters of the Year, a Table of Ex-
pence and Interest; with necessary
Rules for Husbandry, and other things
worthy to be Observed.

Collected, Composed and Published by
LANCELOT COELSON,
Student in Astrology and Physick.

LONDON, Printed for the Company
of Stationers, 1671.

THE

MANUAL

OF THE

YEAR OF OUR

OF THE
ECLIPSES

Which will happen this
present year, 1671.

IT usually falls out, that when there are two full Moons in six months space, in or near the Ecliptick Line ; that there are no Eclipses of the Sun that year, or at leastwise they cannot be of any sensible magnitude, neither be visible in any part of the World, but only near the Poles, as now falls out this present year :

Wherein happens two total and almost Central Eclipses of the Moon.

The first will be upon the 14th. day of *March*, about 13 hours post Meridian, or on the 15 day about 11 hours Anti-meridian : Or to write more plain, about one of the Clock in the Morning on the 15th. day. The other on the 8th. day of *September* about four of the Clock p. m. or Afternoon, both near the Nodes or interfections of her Orb with the Ecliptick, insomuch that there cannot be any Eclipses of the Sun conspicuous in any part of the known World this year.

B 1

The

The first will be visible to our Antipodes and *Periacis*, and will extend to the quantity of 20 *Digiti*, and be seen in *Nova Guinea Insulis Salomonis delos Tubarcues, in mare del gur*, in the Kingdom of *Quivira*, and many other places; besides, the *Molucca* Islands, and the adjacent places, too tedious here to mention.

The other Eclipse of the Moon, is on the 8th. day of *September* as aforesaid, and will in part be visible in the Horizon of *London*, whose beginning is at 51 minutes 29 Seconds past 4 of the Clock Afternoon; the beginning of total darkness will be at 50 minutes 31 Seconds after 5 of the Clock, the middle will be at 40 minutes 56 Seconds after 6 of the Clock; the true opposition will be at 41 minutes 59 Seconds after 6 the end of total darkness will be at 31 minutes 21 Second after 7; the full end will be at 30 minutes 23 Seconds after 8; the Latitude of the Moon at the beginning, *S. A.* 1 minute 12 Seconds, at the end 12 minutes 49 Seconds.

The beginning thereof cannot be seen at *London*, by reason the Sun Sets 9 minutes after 6 at which time the Moon riseth totally darkned in the East Horizon, that so only the middle and end will be seen at *London*, if clouds hinder not, the Meridian of this Eclipse is removed from *London* to the East 5 hours 19 minutes 4 Seconds, and passeth in the Longitude of 104 degrees 6 minutes thorough *Parthia, Gulfe of Bengala, Madagascara, India, intra & extra Gangem, &c.*

There is also two Eclipses of the Sun, but so small to those parts of the World where they will be visible, it is in vain to name them.

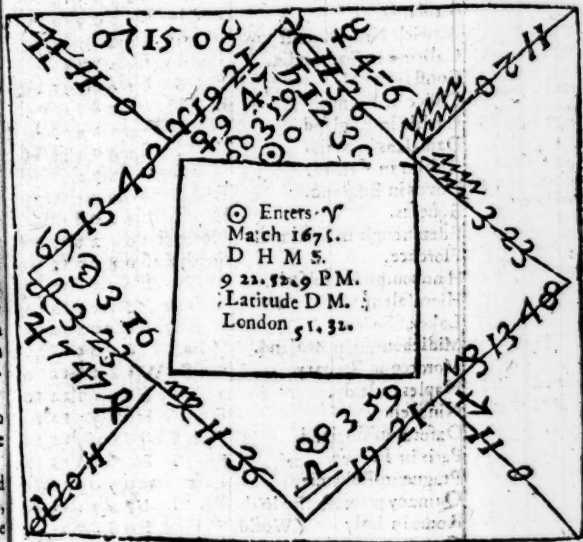

One is upon the 28th. day of *February*, and should be seen only within the Straights of *Megallonica*, but it will be so exceeding small, it will hardly be seen there.

The

Coelson 1671.

The other much alike to this happens upon the 23 of August, which will not extend to a digit, and to be seen only in the North parts of the Earth, within the Circle of the Arctick.

The ingress of the Sun into Aries.

Coarson 1671.

Coarson 1671.

It is altogether needless to give you any example upon any of the foregoing Tables, they being so easie to be comprehended by the meanest capacity.

That which most requireth an example, is the preceding Tide-table.

Suppose I would know when it is full Sea at any of the places there mentioned, but we will fix particularly upon *Dover, Yarmouth, Harwich, or Calice-Road*, upon the 4th. day of *January* this present year, at which time you finde the Moon three days old, seek in the Table in the first Column under the *D* Age for the Figure 4, from which cast your eye streight upon the right hand till you come to the Column, on the top of which you will finde all the places before mentioned, there you will see it is High-water at any of them places that day at 42 minutes past one of the Clock afternoon, and so of all the rest

*Time stays for no Man,
A Complement of Old;
The swiftness of the Tide,
The Table doth unfold.*

The names of the principal Fairs in England and Wales, together set forth; with the Moneth, Day, and Place where they be kept, more largely than heretofore.

Fairs in January.

THe 3 day at Llanibithery, & at Hickerford in Lancashire, the 6 day being Twelfth day, at Salisbury, at Bristow, the 7 day at Llanginnie, the 15 day at Bristol, Churchingford, at Gravesend, the 31 at Llandyffel.

Fairs in February.

The first at Bromley in Lancashire, the 2 at Bath, at Bicklesworth, at Bugworth, at Faringdon, at Codlemew, at Lin, at Maidstone, at Reading, at Beckonsfield,

Coelfon 1671.

field, at the Vizes in Wiltshire, at Whiteland. The 3. at Boxgrove, at Brimley. The 6 at Stafford for six days for all kind of Merchandize, without arrests. The 8 at Iraragon. The 9 at Llandaff. The 14 at Owddle in Northamptonshire, Feversham. The 14 at Baldoc, Bourn, Freom, Henly upon Thames, Higham-ferris, Tewksbury, Uppingham, Walden. The 16 at Stanford, an Hoxle-Fair.

Fairs in March.

The first day at Langadog, at Llangevallah, at Madrim. The 3 at Bremwel-braks in Norfolk. The 4 at Bedford, at Oakham. The 8 at Taragaron. The 12 at Spaford, at Stamford, at Sudbury, at Woobourn, at Wrexham, at Bodnam and Alsom in Norfolk. The 13 at Wye, at Bodwin in Cornwall, at Mountbowin. The 17 at Parrington. The 18 Sturbridge: The 20 at Alisbury, at Durham. The 24 at Llanerchernith. The 25 at S. Albanes, at Ashwel in Hartfordshire, at Burton, at Cardigan, at Cartwalden in Essex, at Huntingdon, at S. Jones in Worc. at Malden, at Malpas, at Newcastle, at Northampton, at Onay in Bucks, at Woodstock, at Whiteland, at great Chard. The 30 at Malmesbury. *Fairs in April.*

The 2 at Hitchen, Northfleet, at Rochford. The 3 at Leek in Staffordshire. The 5 at Wallingford. The 7 at Darby. The 9 at Billingsworth. The 12 at Stanford. The 13 at Amptil, at Bewdley, at Browton, at Bristol, at Bilsen, at Bury in Lancash. at Castlecombs, at Charing, at Chichester, at Engfield in Suffex, at Gifford, at Bishops-Hatfield, at Hunningham, at Ipswich, at Kilborough, at Lonquer, at Northampton, at Nutlay in Suffex, at S. Pombes, at Sabrigworth, Tamworth, at Wilton, Wortham, Riliborough, Harbin in Norfolk, Sapfar in Hartfordshire. The 25 at Bourn in Lincolnshire, Buckingham, Caln in Wiltshire, Cliffe in Suffex, Colbrook, Dunmow in Essex, Darby, Innings in Buckingham. Oakham, Uttoxeter, Winchcombe. The 26. Tenderden in Kent, Cleve. *Fairs*

In these three Tables you have the Interest due upon any sum of money, from a shilling to 100 l. Over the head of the Table is the denomination of the time; and as that, over the head of the common Angles are the letters l. s. p. f. signifying pounds, s. shillings, p. pence, f. farthings.

Coelfon 1671.

So that now followeth a Brief description of the four Quarters of the year, with the time of the Suns entrance or ingress into the four Cardinal Points or Signs of the Zodiack.

Of the Spring.

And first of the Spring, who takes his beginning as you see in the preceding Figure, the 9th. day of March, 12 hours 52 minutes *A. M.* which is the same to say the 10th day 8 minutes before 11 of the Clock before noon, at which time the Sun enters the first scruple of *Aries*, which makes the Earth to smile with the sight of his glorious countenance coming to revive what frowning Winter had almost destroyed.

This season by nature is hot and moist, the most temperate time of the year, a very convenient time to take Physick, to unburthen nature of all such humours as do oppress him, either by Purgings, Bleeding, or otherwayes, as occasion shall permit; In this Quarter the body of man is inclinable to certain Feavers, Jaundies, Imposthumes, Swellings, Squinzes, Boils, Itch, Pusshes, Pox, Bleeding at Nose, Spotted Feavers, and such other Diseases occasioned by the quantity or quality of blood.

Of Summer.

This Quarter takes his beginning upon the 11 day of June, 38 minutes after one of the Clock after-noon, at which time the Sun enters the first scruple of the sign *Cancer*, causing longest days and shortest nights to all on this side the *Aequator*, and is by nature hot and dry, causing the humours in man to wax hot and dry, fets Cartels, and brings all Fruit to ripeness, encreasing the Rich mans store, and maketh the Earth fade, with the bodies of men, women, and Children, by reason of those many Diseases the body is now subj:ct to receive, viz. Burning Feavers, Phrenesies, Inflammations, Imposthumes and lacerations of the Lungs, and Bladder, hear in the Reins,

Coelfon 1671.

Reins, the Gonorrhæah, Iliack Passion, Strangury,
and such diseases as proceed from choller.

Of Autumn.

This Autumnal or Harvest quarter, takes his beginning upon the 12 day of *September*, 48 minutes after 4 of the Clock in the morning, at which time the Sun enters the first scruple of *Libra*, who is very variable and unconstant, causing warm days, but cold nights, and the body as incident to grievous diseases as at any time of the year, viz. Quartaine Agues and unconstant Feavers, Vertigo's, and Apoplexies, Fistula's, Fluxes, Hemorrhoides, Dysenteries, pain of the Back and Reins, Stone, suppression, Palsies, Convulsions, Cramps, Consumptions, Madness, and distractions, occasioned by melancholly panis in the Sides, occasioned by Winde, obstructions of the Spleen, and such Diseases thereby occasioned.

Of Winter.

This Quarter takes his beginning this year on Munday the 11 day of *December*, 37 minutes after 4 of the Clock afternoon, at which time the Sun enters the first scruple of *Capricorn*, causing shortest days, and longest nights to all on this side the *Æquator*, and is a great Antagonist to the *Spring*, a destroyer of the fruitful Harvest, and a disgrace to Summer, by nature cold and moist; no great felicity to the weary Traveller, and causeth many obstructions in the bodies of old people and others, who are incident to receive Colds, Coughs, Rhumes, Palsies, Poles, Cramps, Convulsions, Vertigo's, Epilepsies, Apoplexies, Chollicks, Hoarseness, Fluxes, Pain in the Teeth, Noise in the Ears, and Agues of all sorts.

*Thus do the Stars incline to work us ill,
But all shall be as the Maker will;
So every Planet in his kinde,
Is to perform the Almighty's minde.*

Monthly

Monthly Observations for Husbandmen.

In January. Set Quicksets, Roses, Peaches, Plumbs, fell Timber, set Beans, sow Berries, Kernolds, lop Trees, drench Cattel, tallow Land, and dung Gardens.

In February. Plant Vines, Hops and Willows, sow Pease and Mustardseed, and cut Hedges.

In March. Plow Land for Barley, Geld Lambs, graft Trees, and sow Oats, Onions, Parsnips, Carrets, Cowcumbers, Melons, and Potherbs.

In April. Sole Hops, sow Bailey, Hemp, & Flax.

In May. Wean Lambs, set and sow all manner of fine Herbs and Seeds.

In June. Set Rosemary, Carnations, and Gilliflowers, and shear Sheep.

In July. Gather Herbs and Flowers to dry for Winter: draw Hemp and Flax.

In August. Gather Summer Fruit, sow winter Herbs, gather Garden Seeds, mow Oats and Barley.

In September. Remove Flowers, gather Hops, Apples, begin to sow Wheat and Rye.

In October. Cut Rose Trees, set Nurs and Fruit Kernells, sow Wheat and Rye.

In November. Set Crabtree Stocks, kill Hogs, & make Mauls.

In December. Fallow Land for Barley, fell Timber to make it durable, set Beans and Pease.

Courteous Reader,

You may find the Author at Home every day in the week, till one of the Clock Afternoon, who by your Urine or the relation of your illness will satisfy you the Nature of your Disorder and its effects, and if recover again or not; and if curable.

He hath Medicines always prepared, which with the blessing of God work a good effect, with as much speed as Art will admit of, considering the Nature of the Disease, viz.

Agues and Fevers of all sorts, Dropsies, Gouts, Consumptions, Prick or Shortness of breath, Deafness, a speedy cure, if curable, although of long continuance, pains in the back, Stomach, Bowels and Loins, or in any part of the Body; the cold Disease, or Ruining of the Reins, he cureth with much Care & Secrecy, and with a rare Water which takes away Freckles and Sun-burns from the face, and causeth a beautifull Complexion.

From my Houſe at the Sign of the Royal Oak in St. Katherine's Lane, near the Tower of London, May 30. 1670.

Vale.
